Subject index

A

Acetylcholine 266, 531, 592
– receptor 346
– – channel 62
– receptors 51
– release 74
– -activated ion channel 62
Acid base regulation 471
– load 276
Acidosis 292
Acinar cells 120
Action potential 102
Actions potentials 284
Activation-contraction coupling 564
Adenosine triphosphate 214
Adrenal chromaffin cells 611
α_2-adrenergic agonists 512
α-Adrenergic receptors 592
α_2-Adrenoceptor agonists 614
Adrenomedullary chromaffin cell 346
Adynamia episodica hereditaria with myotonia 297
After-potential 261
Albumin 383
Aldosterone 319
Amiloride 193, 276, 319
Amino acids 442
Amphibian sciatic nerve 68
Anion conductance 35
Anoxia-induced K current 238
Antiarrhythmic drugs 234, 308
Antibody 471
Apamin 284
Apical membrane 193
– Na^+/H^+ exchange 276
Apparent mineralocorticoid excess 538
Arachidonic acid 431
Arrhythmogenic period 238
Arterial smooth muscle 564
Arylaminobenzoates 556
Asymmetric displacement currents 423
ATP 153, 447
ATP activation 551
– antagonists 214
– -induced hyperpolarization 551
– -sensitive K channel 68
– -sensitive K channels 261
– -sensitive K^+ channel 338
Atrial cells 338
Axon 68

B

B^{2+} 400
Barium 26, 271
Basolateral membrane 26, 193
Bay K 8644 144
Bicuculline 7
Bile acids 538
2'7'-bis(carboxyethyl)-5,6-carboxyfluorescein acetoxymethyl ester 276
Blockade of Cl channels 204
Bombesin 120
Bradykinin 581
Brain mRNA 447
– temperature 176
Bumetanide 519
Bursting electrical activity 417

C

Ca channel 284
– current 238
– overload 238
Ca^{2+} and myosin phosphorylation 564
– channel 137, 144
– – blockers 292
– channels 462, 592
– concentration 564
– currents 144, 611
– oscillation 1
– release channel 353
– -activated K^+ channel 271, 308
– -dependent Cl^- current 447
$[Ca^{2+}]_i$ 447
– oscillations 417
Ca^{2+}-induced Ca^{2+} release 1, 353
Ca^{2+}-overloaded stores 462
CA3 pyramidal cells 184
Ca-activated chloride current 168
– K channels 68
Cable analysis 500
Caffeine 168, 581
Caged ATP 437
– $InsP_3$ 437
– -ATP 523
Calcitonin-gene-related peptide 338
Calcium 193,333
– action potentials 284
– activation 120
– channel(s) 86,437, 614
– current 168,437
– dynamics 184
– influx 102
– release 109, 168
– -activated potassium channel 271
Calmidazolium 228
Calmodulin 228
– -dependent myosin 564
Calpain 86
Calpastatin 86
cAMP 228
Carbachol 531
Carbon dioxide 7

D

Dansylaziridine (TnD_{DANZ}) 333
Demyelination 408
Dendrotoxin 408
Denervated muscle 284
Denervation 601
Depolarization-secretion coupling 611
Desynchronized sleep (DS) 512
D-galactose 79
D-glucose 79
Diabetes mellitus 14

Diabetic nephropathy 14
– neuropathy 68
Diaminopiridine (3-4 DAP) 284
Dicarboxylate transport 371
DIDS 204
Diffusion of corticosteroids 371
Digital-imaging microscopy 40, 109
Dihydropyridine 144
Dihydropyridine (DHP) 137
Dithiothreitol 51
Diuresis 442
Diuretics 519
Dorsal pontine tegmentum 512
d-tubocurarine 74
– (d-TC) 214

E

Ecrine sweat gland cells 271
EGTA 238
Eicosanoids 360
Electrical activity 417
– stimulation 153
Electrogenicity of cotransport 79
Electron microprobe analysis 14
Electrophysiological studies 608
Electrophysiology 292, 308, 504
EMG 301
Endocytosis 383
Endothelin 168
Endothelium-derived relaxing factor (EDRF) 266
End-plate 74
– hyperpolarization 74
Endurance exercise 161
Enteric nervous system 575
Enzyme inhibitors 538
Epithelia 193, 400
Epithelial chloride channels 491
– Cl channels 544
Erythropoietin production 228
Ethylisopropylamiloride (EIPA) 276
Excised neuronal membranes 614
Excitation/contraction coupling 1, 40
Excitation-contraction coupling 137
Excitatory postsynaptic potentials 575
Exercise 161, 301
Exocytosis 611
Extrahepatic biliary obstruction 538
Eyring rate theory 400

F

Fast-twitch muscle 572
Fatigue 153
Fatty acid oxidation 572
Ferret heart 313
Filament state 333
Fluorescence 333
Force 153
– development 523
Frog olfactory receptor neurone 504
– sartorius muscle 261
– skin 193
Fura-2 109
– fluorescence 551
– imaging 40
– -fluorescence 184
Furosemide 519

G

GABA 7
– antagonist 7
GABAergic mechanism 7
Garter snake, *Thamnophis spp* 325
Gating currents 423
Glibenclamide 261
Glomus cell 93
Glucagon 519
Glycogen 301
Glycolytic intermediates 301
G protein 346, 592
G-Proteins 137, 551
GTP-binding protein 338
GTPγS 137

H

Heart 1, 248, 266
– of the ferret 313
Heat-stable cytosolic Cl^- channel inhibitor 491
Hemicholinium-3 74
Heparin 437
Hereditary muscle disease 297
Hippocampal slice cultures 184
H^+-ATPases 471
Human keratinocytes 18
– muscle 234
– myoballs 234
HVA/N-type calcium channels 614
11β-Hydroxysteroid dehydrogenase (oxidoreductase) 538
Hypercapnia 292
Hyperkalemic periodic paralysis 297
Hyperpolarization 74, 190, 431
Hypertrophy heart 313
Hypothalamus 7
Hypovolaemic oliguria 442
Hypoxia 68, 93, 228

I

^{125}I-d$(CH_2)_5$ [Tyr (Me)^2, Thr^4, Tyr-NH$_2^9$] OVT binding 220
Immunocytochemistry 471
Impedance 193
Inactivation 129
Increased net current 238
Indanyloxyacetic acid 556
Indomethacin 360, 431
Inhibition of 11β-HSD 538
Inhibitor of epithelial chloride channels 491
Inorganic phosphate 333
Inositol 1,4,5-triphosphate 1
– triphosphate 437
Instruments and techniques 608
Insulin 519
Intercalated cells 471
Internal Ca release 109
Intracellular Ca^{2+} 417
– calcium 531
– – activity 551
– free Ca^{2+} 40
– Na activity 313
– pH 35
– – indicator 276
– potential 400
Inverted microscope 608
Inward rectification 190
– rectifier 601
Ion channel(s) 51, 62, 271, 338, 462, 601
– permeability 214
– -sensitive micro-electrode 313
Ischaemic myocardium 453
Islet of Langerhans 417
Isobutylmethylxanthine 581
Isolated cardiocytes 238
– ciliary muscle strips 531
– hepatocytes 519
– perfused rat kidney 228
– rabbit heart 266
– smooth muscle cell 168
Isometric contractile response 313
Isoproterenol 575

J

"Juvenile" sodium channels 234

K

K channel 261
– – opener (SR 44866) 261
K channels 68
K conductance 284
K current 581
K-channel 120
K-current 238
Keratinocytes 18
15-kDa membrane proteins 471
Kidney 26, 360, 371
– (MDCK) cells 551
Kidneys of normal and acidotic rats 471
Kinetics of cotransport 79
K^+ channel 271, 408
K^+ channels 400, 519, 551
K^+ conductance 292
K^+ current 93, 292, 338
K^+ depolarization 109
K^+/Na^+ currents 190

L

L-Arginine analogues 266
L-lactate uptake 393
L-leucine hydroxy analogue 393
Liver cell volume 519
– cirrhosis 538
Locus coeruleus 512
Locust skeletal muscle 190
Loop diuretics 519
Lorentzians 544
L-type calcium channel 86

M

M current 581
Madin-Darby canine kidney 431
"Maxi-K" channels 271
MDCK cells 35, 431, 551
Mechanical activity 261
Membrane capacitance 611
– conductances 319
– currents 18
– patches 308
– potential 417
– transport 371
– vesicles 325, 393
Membranes 614
Mesenteric artery 168

[Met^5] enkephalin 614
Metabolic acidosis 471
– transformation of steroid hormone 538
Methylamines 442
α-methyl D-glucopyranoside 79
Methylxanthines 581
Michaelis-Menten constants 400
Microdissected tubules 220
Microelectrode recordings 193
Microinjection 7
Micromanipulation 608
Microspectrofluorometry 276
Microsurgery 608
Mitochondrial-rich cells 544
Molecular modelling 234
Muscarinic receptor(s) 338, 592
Muscarinic-gated K^+ current 338
Muscle cells 292, 437
– contraction 161, 333
– disease 297
– fibres 284
– metabolism 301
– non-exercising 301
– tension 261
Myelinated nerve fibre(s) 68, 408
Myenteric neurons 575
Myoballs 234
Myocardial ischaemia 453
Myocyt 168
Myocytes 86, 238
Myosin 17kDa light chains 523
– light chain 523, 564
– phosphorylation 564
Myotubes 40

N

Na currents 261
Na^{2+}/glucose cotransporter 79
Na/Ca exchanger 248
Na^+ channels 297
Na^+ currents 193
Na^+/Ca^{2+} exchange 313
Na^+/H^+ antiport 519
Na^+/H^+ exchange 325
Na^+/H^+ exchange activities 276
Na^+K^+2 Cl-symport 519
Nephron microdissection 220
Nephropathy 14
Nerve cells 614
– terminals 102
N-ethylmaleimide 51
Neuroblastoma cell 129
Neuroblastoma × glioma hybrid cells 581
Neurohypophyseal hormones 220
Neuronal membranes 614
Neuropeptide Y 346
N^G-Nitro-L-arginine 266
Nicotinic cholinergic currents 346
Nitrate 319
Nitric oxide 266
Nitrogen-sparing diet 393
5-Nitro-2-(3-phenylpropylamino)-benzoates (NPPB) 556
Nitroprusside 462
Noise analysis 193
Non-gated channels 544
Non-specific cation channel 214
Noradrenaline 592, 614
Norepinephrine 575
Normothermia 176
NPEB 556
NPPB 556

O

Olfactory receptor neurones 504
Oliguria 442
3-O-methyl D-glucoside 79
Oocyte, *Xenopus* 79
– expression system 423
Opioid 614
Opossum kidney cells 383
Organic cation transport 325
O_2-sensitive K^+ current 93
– rat carotid body cells 93
Oscillations calcium 417
Osmoregulation 442
Outwardly rectifying Cl^- channel 491
Oxygen pressure 228
Oxytocin 319

P

p-Aminohippurate transport 360, 371
Pancreatic acinar cells 120
– islets 417
Panting 176
Paracellular pathway 544
Paralysis 297
Paranodal demyelination 408
Parasympathetic 575
Patch clamp 26, 51, 62, 68, 86, 129,144, 346, 423, 462, 479, 556
– – technique 297
– clamping 292
– recording 93
Patch-clamp 120, 608
Patch-clamp technique 18, 308
Pathophysiology 538
P4-denervated fibres 601
PEG 556
Perforated patch recording 611
Periodic paralysis 297
Pertussis toxin 551
pH 292
Phaeochromocytoma cells 214
Phase detection 611
Phentolamine 575
Phenylephrine 575
Phorbol ester(s) 500, 551
Phosphate 153
Phosphocreatine 153
Phosphodiesterase inhibitors 360
Phrenic nerve 7
PI response 168
Picrotoxin 7
Placenta trophoblast cells 479
Platelets 266
Polyhydric alcohols 442
Pontine reticular formation 512
Portal vein 308
Postextrasystolic potentiation 453
Potassium channel(s) 68, 120, 308, 408, 423
– -channel-blocking agents 102
– conductance 26, 35, 431
– current 168, 190
– gating currents 423
– permeability 271
– -selective channels 26
Prazosin 575
Probenecid 360
Procaine 544
Propranolol 575
Prostacyclins 360
Prostaglandins 360, 431
Protease inhibitor 86
Protein kinase C 500, 551, 581
– – – (PKC) activators 500
– – – (PKC) inhibitor 500
Protein reabsorption 383
Proton-driven transport 393
Proximal tubular cell 14
– tubule 360, 371,tubule 383
– – cells 26
Purinergic receptor 447
Purinoceptor-operated current inward 214
P_{2Y} purinoceptor 447

Q

Quinidine 519
Quinine 271

R

Rabbit fast-twitch muscle 572
Radioimmunoassay 228
Rb^+ 190
Reactive blue 2 (RB2) 214
Receptor, Ryanodine 353
– neurones 504
– -mediated endocytosis 383
β-Receptor 575
α_1-Receptors 575
Rectifying outward K^+ currents 592
Reinnervation 284
Relaxation 153
REM sleep 512
Renal brush-border proteins 471
– – membrane 491
– – – vesicles 325
– inner medulla 442
– MDCK cells 551
– oxygen sensing 228
– transport 14, 371
Reoxygenation 238
– -induced I_{ti} 248
Reperfusion 453
Respiratory chain 572
– epithelial cells 479
– heat loss 176
– response to CO_2 7
Run-down 86
Ryanodine receptor 353

S

Salt acclimation 319
Sarcoplasmic reticulum 1, 109, 137, 353, 462
Sciatic nerve 68
Secretagogues 417
Selective brain cooling 176
Selectivity of sugar transport 79
Serotonin 266
Shivering 176
Short-chain phospholipids 62
Shortening velocity 523
SIDS 204
Single cell microspectrofluorometry 276

– rat cardiac myocytes 109
– smooth muscle cells 437
– -cell activity 608
– -channel analysis 129
Skeletal muscle 137, 153, 190, 261
– – cells 40
– – chloride channels 500
– – development 601
– – fibres 161
Skin of *Rana temporaria* 400
Skinned fiber 1
– fibres 137, 333
– skeletal muscle fibres 161
Sleep REM 512
Slice cultures 184
Small intensely fluorescent cell 93
– intestine 79
– -intestinal brush-border membrane 393
Smooth muscle 353, 523, 564
– – cells 204, 437, 462, 462
Sodium channel(s) 129, 234
– concentration 14
– transport 319
Somatic sodium channels 504
Somatostatin 614
Spike overshoot 261
Staurosporine 500, 581
Steady-state inactivation 504
Stilbene-sulphonic acid 556
Stomach 575
Stunned myocardium 453
Sugar transport 79
Sulphate transport 371
Suramin 214
Sweat gland cells 271
Swimming 161
Sympathetic 575
– ganglion 592
– nerve terminals 102
Systolic wall thickening 453

T

Tedisamil 308
Tension activation 137
Tetraethylammonium 308
– (TEA) 284
– transport 325
Tetrodotoxin 234
Tetrotoxin 261
Theophylline 581
Thermoregulation 176
Thin filament state 333
Thromboxane B_2 360
TnD_{DANZ} fluorescence 333
Toad skin (*Bufo viridis*) 319
Toad urinary bladder 193
Tocainide and chiral analogs 234
Transient inward current 238, 248
Trunk temperature 176
Tubular protein reabsorption 383

V

Vagus 575
Vascular smooth muscle 308
– – + cells 204
Vasodilation 462
Vasomotor terminals 102
Vasopressin analogues 220
Venom of the Eastern green mamba snake 408
Ventricular myocytes 86
Visceral smooth muscle cells 144
Voltage clamp 184, 504, 608
– dependence 26, 214
– divider ratio 400
– -clamp 79
– – technique 601
– -dependent calcium channels 437
– – currents 346
– -gated Ca^{2+} channels 462
– – inward membrane currents 261
Volume regulation 35
– – (cell) 519
– regulatory decrease 35
Whole cell recording 238
– – patch clamp 346
– – recording 234
V_2 vasopressin receptors 220

X

Xenopus oocyte 447
– oocytes 79, 423

Y

Y_2 receptor 346
Yohimbine 575

Z

Z-line region 109
Zn 204
